⊄ OpenID®

CERTIFICATION OF CONFORMANCE
TO OPENID CONNECT CONFORMANCE PROFILE

Name of Entity ("Implementer") Making this Certification: OGIS-RI Co.,Ltd.

Software or Service ("Deployment") Name & Version #: ThemiStruct Identity Platform v1.3.0

OpenID Connect Conformance Profile: OP Basic, OP Implicit, OP Config

Conformance Test Suite Software: op.certification.openid.net as of April 28, 2017

Test Date: April 28, 2017

1. <u>Certification</u>: Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.

2. <u>Maintenance</u>: If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.

3. <u>Incorporation of Terms</u>: The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at http://openid.net/certification/, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: _Takashi Yahata_

Name: Takashi Yahata

Title: Deputy General Manager

Date: April 28, 2017

Optional: Please provide the following information if you want your implementation to be included in the list of certified implementations at http://openid.net/developers/certified/. Providing this information is not required for OpenID Certification.

URL at which people interested in using your implementation can learn about it and/or obtain it:

http://www.ogis-ri.co.jp/pickup/themistruct/themi_ip.html (Japanese Only)

1-2 sentence description of the implementation:

"ThemiStruct Identity Platform" is software runs on AWS Managed

Services. It makes possible to build up a scalable and highly

available identity platform on your own Amazon VPC environment.

The programming language of the software and deployment environment for it, if applicable (e.g., "JavaScript for Node.js", "Binaries for iOS", or "Service"):

Modules for OpenID Connect are written in JavaScript and run on AWS

Managed Services (Amazon API Gateway, AWS Lambda, ...).

Licensing terms of the software, if applicable (e.g., "Apache 2.0" or "Proprietary"):

Proprietary ("ThemiStruct Identity Platform" service subscription agreement required.)
