

**CERTIFICATION OF CONFORMANCE
TO OPENID CONNECT CONFORMANCE PROFILE**

Name of Entity ("Implementer") Making this Certification: Authlete, Inc.

Software or Service ("Deployment") Name & Version #: Authlete 1.1

OpenID Connect Conformance Profile: Basic OpenID Provider

Conformance Test Suite Software: OpenID Foundation Conformance Test Suite

Test Date: July 3, 2017

1. **Certification:** Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.
2. **Maintenance:** If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.
3. **Incorporation of Terms:** The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at <http://openid.net/certification/>, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: (V) 崎 貴彦

Name: Takahiko Kawasaki

Title: Representative Director

Date: July 5, 2017

Optional: Please provide the following information if you want your implementation to be included in the list of certified implementations at <http://openid.net/developers/certified/>. Providing this information is not required for OpenID Certification.

URL at which people interested in using your implementation can learn about it and/or obtain it:

http://authlete.com/

1-2 sentence description of the implementation:

Authlete provides a partially hosted implementation of OAuth and OpenID Connect that allows
custom user authentication components to call a hosted API which processes the incoming
standard-compliant request messages and returns actions for the custom component to execute.

The programming language of the software and deployment environment for it, if applicable (e.g., “JavaScript for Node.js”, “Binaries for iOS”, or “Service”):

Service

Licensing terms of the software, if applicable (e.g., “Apache 2.0” or “Proprietary”):
