OpenID

CERTIFICATION OF CONFORMANCE
TO OPENID CONNECT CONFORMANCE PROFILE

Name of Entity ("Implementer") Making this Certification: _____ZmartZone IAM_____

Software or Service ("Deployment") Name & Version #: _____mod_auth_openidc 2.3.1_____

OpenID Connect Conformance Profile: _____Basic Relying Party_____

Conformance Test Suite Software: _____rp.certification.openid.net version 1.0.3 as of July 21st, 2017_____

Test Date: _____July 21, 2017_____

1. Certification: Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.

2. Maintenance: If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.

3. Incorporation of Terms: The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at http://openid.net/certification/, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: _____

Name: ___Hans Zandbelt_____

Title: ___Founder / IAM Architect_____

Date: ___July 21, 2017_____

Optional: Please provide the following information if you want your implementation to be included in the list of certified implementations at http://openid.net/developers/certified/. Providing this information is not required for OpenID Certification.

URL at which people interested in using your implementation can learn about it and/or obtain it:

https://www.mod-auth-openidc.org

1-2 sentence description of the implementation:

mod_auth_openidc is an authentication/authorization module for the Apache 2.x HTTP server that functions as an OpenID Connect Relying Party, authenticating users against an OpenID Connect Provider. It can also function as an OAuth 2.0 Resource Server, validating OAuth 2.0 access tokens presented by OAuth 2.0 Clients.

The programming language of the software and deployment environment for it, if applicable (e.g., "JavaScript for Node.js", "Binaries for iOS", or "Service"):

C, Apache HTTPd module

Licensing terms of the software, if applicable (e.g., "Apache 2.0" or "Proprietary"):

Apache 2.0
