

**CERTIFICATION OF CONFORMANCE  
TO OPENID CONNECT CONFORMANCE PROFILE**

Name of Entity (“Implementer”) Making this Certification: ZmartZone IAM

Software or Service (“Deployment”) Name & Version #: mod\_auth\_openid 2.3.1

OpenID Connect Conformance Profile: Implicit Relying Party

Conformance Test Suite Software: rp.certification.openid.net version 1.0.3 as of July 21<sup>st</sup>, 2017

Test Date: July 21, 2017

1. Certification: Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.
2. Maintenance: If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.
3. Incorporation of Terms: The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at <http://openid.net/certification/>, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: 

Name: Hans Zandbelt

Title: Founder / IAM Architect

**Optional:** Please provide the following information if you want your implementation to be included in the list of certified implementations at <http://openid.net/developers/certified/>. Providing this information is not required for OpenID Certification.

**URL at which people interested in using your implementation can learn about it and/or obtain it:**

<https://www.mod-auth-openidc.org>

**1-2 sentence description of the implementation:**

mod\_auth\_openidc is an authentication/authorization module for the Apache 2.x HTTP server that functions as an OpenID Connect Relying Party, authenticating users against an OpenID Connect Provider. It can also function as an OAuth 2.0 Resource Server, validating OAuth 2.0 access tokens presented by OAuth 2.0 Clients.

**The programming language of the software and deployment environment for it, if applicable (e.g., "JavaScript for Node.js", "Binaries for iOS", or "Service"):**

C, Apache HTTPd module

**Licensing terms of the software, if applicable (e.g., "Apache 2.0" or "Proprietary"):**

Apache 2.0
