

**CERTIFICATION OF CONFORMANCE
TO OPENID CONNECT CONFORMANCE PROFILE**

Name of Entity ("Implementer") Making this Certification: Ping Identity Corporation

Software or Service ("Deployment") Name & Version #: PingFederate 9.2.1

OpenID Connect Conformance Profile: Basic Relying Party

Conformance Test Suite Software: rp.certification.openid.net as of Feb 4, 2019

Test Date: Feb 4, 2019

1. Certification: Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.
2. Maintenance: If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.
3. Incorporation of Terms: The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at <http://openid.net/certification/>, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: 

Name: Tanny Wong

Title: Senior Software Quality Engineer

Date: Feb 4, 2019

Implementer's Authorized Contact Information	
Name:	Samson Tsui
Title:	Software Quality Engineer Intern
Phone:	604-697-7030
Email:	samsontsui@pingidentity.com
Address:	600 - 564 Beatty Street
City, State/Province, Postal Code	Vancouver, B.C., V6B 2L3
Country	Canada

Optional: Please provide the following information if you want your implementation to be included in the list of certified implementations at <http://openid.net/developers/certified/>. Providing this information is not required for OpenID Certification.

URL at which people interested in using your implementation can learn about it and/or obtain it:

<https://www.pingidentity.com/en.html>

1-2 sentence description of the implementation:

PingFederate enables outbound and inbound solutions for single sign-on (SSO), federated identity management, customer identity and access management, mobile identity security, API security, and social identity integration. Browser-based SSO extends employee, customer and partner identities across domains without passwords, using only standard identity protocols (Security Assertion Markup Language—SAML, WS-Federation, WS-Trust, OAuth and OpenID Connect, and SCIM).

The programming language of the software and deployment environment for it, if applicable (e.g., “JavaScript for Node.js”, “Binaries for iOS”, or “Service”):

Licensing terms of the software, if applicable (e.g., “Apache 2.0” or “Proprietary”):
