1. OP Signing Key Rotation: Implementer attests that the deployment correctly handles OP signing key rotation as described in Section 10.1.1 of the OpenID Connect Core 1.0 specification. This attestation statement is included in the certification submission materials because some deployments may not be able to demonstrate handling key rotation in the RP testing tool at the present time for the test rp-key-rotation-op-sign-key (Request an ID Token and verify its signature. Make a new authentication and retrieve another ID Token and verify its signature.).
