

Meeting minutes

Attendees:

Adam Dawes, Ivor Griffiths, Luke Camery [Google]  
Dick Hardt, Eve Hu, Christina McDonald, Denise Kim [Amazon]  
Tom Smedinghoff [Locke Lord LLP/OpenID Foundation]  
Shelly Scott, Chris Faye, Tom Pigoski [Intuit]  
Bjorn Hjelm [Verizon]  
Tushar Pradhan [Paypal]  
Morteza Ansari [Cisco]  
Jeb Ringo, Sadyk(sp?) [CapitalOne]  
DK Satija [Bank of America]  
Jennifer Ruehr [Adobe]  
Eric Davis [Symantec]

[Overview of RISC](#)

- Participants discussed the following principles around sharing:
  - Data is our customer's data; they should have control.
  - Data is for security and protection only, limitation of use
  - Expectation around reciprocity - does not have to be symmetric.
  - Companies can choose whom to share with and what to share.
  - Doing right by the customer.
  - Being transparent to the user.
  - Data is not re-shared directly with others. Receivers may take action on information received and send out results of those actions to others
  - Protection of data, disposal of data, security practices, duration of use
  - Respect the user's jurisdiction and applicable laws
  - There should be transparency between transmitter and receiver about the exact signals that are being shared.
  - No warranties around sharing of the signals.
  
- Google plans to list all the apps or services that Google is sharing RISC with, and an ability to enable or disable RISC signals to all apps.
  
- Google presented a draft of the Data Sharing and Confidentiality Agreement and is seeking feedback from multiple parties to work toward a proposal to be contributed to the working group.

**Action items:**

**Participants to provide further feedback on the draft Data Sharing and Confidentiality Agreement by February 7, 2018**  
**Google to circulate an updated draft of this Agreement by February 21, 2018**
