CERTIFICATION OF CONFORMANCE
TO OPENID CONNECT CONFORMANCE PROFILE

Name of Entity ("Implementer") Making this Certification: AuthMachine

Software or Service ("Deployment") Name & Version #: AuthMachine 4.0.7

OpenID Connect Conformance Profile: Form Post OP

Conformance Test Suite Software: op.certification.openid.net 2.1.4

Test Date: 17 July 2018

1. <u>Certification</u>: Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.

2. <u>Maintenance</u>: If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.

3. <u>Incorporation of Terms</u>: The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at http://openid.net/certification/, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature:

Name: Adrian McPhee

Title: Director

Date: 19 July 2018

Implementer's Authorized Contact Information	
Name:	Adrian McPhee
Title:	Director
Phone:	+31 6 11 28 25 93
Email:	adrian@carrierwave.com
Address:	Jacques Perklaan 2
City, State/Province, Postal Code	Heemstede, North Holland 2106EP
Country	The Netherlands

Country	

Optional: Please provide the following information if you want your implementation to be included in the list of certified implementations at http://openid.net/developers/certified/. Providing this information is not required for OpenID Certification.

URL at which people interested in using your implementation can learn about it and/or obtain it:

https://authmachine.com

1-2 sentence description of the implementation:

AuthMachine is a software platform that can be setup in minutes and delivers powerful, pain-free Identity and Access Management (IAM) within your private cloud. In addition to conforming to all six OpenID Connect profiles (Basic OP, Implicit OP, Hybrid OP, Config OP, Dynamic OP and Form Post OP) AuthMachine also provides functionality such as adaptive authentication to prevent phishing attacks, multi-factor authentication, Single Log Out (SLO), registration/sign-up, self-service password resets.

The programming language of the software and deployment environment for it, if applicable (e.g., "JavaScript for Node.js", "Binaries for iOS", or "Service"):

Core application: Python

Admin Console: Javascript/ReactJS

Deployment environment: Docker-based software appliance that can be run on a single server, or easily configured to run in a high-availability architecture on AWS or other clouds

Licensing terms of the software, if applicable (e.g., "Apache 2.0" or "Proprietary"):
