

**CERTIFICATION OF CONFORMANCE  
TO OPENID CONNECT CONFORMANCE PROFILE**

Name of Entity ("Implementer") Making this Certification: WSO2

Software or Service ("Deployment") Name & Version #: Identity Server 5.4.0

OpenID Connect Conformance Profile: Form Post OpenID Provider

Conformance Test Suite Software: op.certification.openid.net 2.1.4

Test Date: July 18, 2018

1. **Certification:** Implementer has tested the Deployment (including by successfully completing the validation testing using the Conformance Test Suite Software) and verified that it conforms to the OpenID Connect Conformance Profile, and hereby certifies to the OpenID Foundation and the public that the Deployment conforms to the OpenID Connect Conformance Profile as set forth above.
2. **Maintenance:** If subsequent changes to the Deployment, or other information or testing, indicates that the Deployment is not in conformance, Implementer will either correct the nonconformance (and update this Certification if necessary) or revoke this Certification.
3. **Incorporation of Terms:** The Terms and Conditions for Certification of Conformance to an OpenID Connect Conformance Profile, located at <http://openid.net/certification/>, are incorporated by reference in this Certification, and Implementer agrees to be bound by such Terms and Conditions.

Authorized Signature: \_\_\_\_\_

Name: Prabath Siriwardena

Title: Vice President, Security

Date: 07/20/2018

**Optional:** Please provide the following information if you want your implementation to be included in the list of certified implementations at <http://openid.net/developers/certified/>. Providing this information is not required for OpenID Certification.

**URL at which people interested in using your implementation can learn about it and/or obtain it:**

<https://wso2.com/identity-and-access-management>

**1-2 sentence description of the implementation:**

WSO2 Identity Server is an identity and access management server that facilitates security while connecting and managing multiple identities across different applications. It enables enterprise architects and developers to improve customer experience through a secure single sign-on environment.

**The programming language of the software and deployment environment for it, if applicable (e.g., “JavaScript for Node.js”, “Binaries for iOS”, or “Service”):**

Java

**Licensing terms of the software, if applicable (e.g., “Apache 2.0” or “Proprietary”):**

Apache 2.0
